

# Vehicle Disinfectant System

## Prevent Cross-Contamination by Vehicles

Microbes latch on to delivery trucks and spread infectious diseases as trucks travel between farms, feed mills, and processing facilities.

All vehicles entering or leaving a controlled environment should be sanitized.

### ✓ EFFECTIVE

Efficient drive-through design allows the vehicle to be automatically sanitized using a disinfectant of choice

### ✓ ENERGY EFFICIENT

Low energy consumption

### ✓ COST PREVENTION

Pro-active approach for preventing cross contamination. Saves money in the long-run

### ✓ FAST

Automated process is 10 times faster than manual washing

### ✓ ECONOMICAL

Fraction of the cost compared to manual sanitation process or large truck wash system

### ✓ SIMPLE

Easy installation, plug-and-play system, and low maintenance

### ✓ RELIABLE

High quality components for continuous operations

### ✓ APPLICABLE

Works with any sized vehicles

Biosecurity™

Prevention is always cheaper than cure.

## Aguair 360° Vehicle Disinfectant System

Our truck disinfectant system provides a necessary security measure to help secure your farm, feed mill, or processing plant from biosecurity risks.

▲ 27 nozzles provide a 360° complete coverage for all sized vehicles.

# The Aguir Vehicle Disinfectant System is a pro-active approach for preventing cross contamination caused by transportation vehicles of all sizes

## Biosecurity Sanitation System

### Requirements:

- 110V/20A Outlet
- 1in Pipe 40-50 PSI Inlet Water

### Water Usage:

- 4.5 Gallons per Truck

## Control System Components

- Self-cleaning screen filter
- Water resistant enclosure with outdoor mount
- Adjustable solution injector
- Maintenance-free injection system
- Low level solution sensor and indicator light
- Automatic vehicle detection system
- Active operation alarm
- 1 inch NPT inlet connection
- 40-50 PSI operating pressure (no pump required)

## Nozzles

- Flat 110° spray pattern provides complete coverage for all sized vehicles
- Minimum 50 PSI operating pressure
- 27 nozzles
- Chemical resistant PVDF nozzles and poly tubing

## Spray Frame

- Galvanized steel frame — G90
- Entry speed bump
- 360 degree coverage of the vehicle
