

Vehicle Disinfectant System

Prevent Cross-Contamination by Vehicles

Microbes latch on to delivery trucks and spread infectious diseases as trucks travel between farms, feed mills, and processing facilities.

All vehicles entering or leaving a controlled environment should be sanitized.

✓ EFFECTIVE

Efficient drive-through design allows the vehicle to be automatically sanitized using a disinfectant of choice

✓ ENERGY EFFICIENT

Low energy consumption

✓ COST PREVENTION

Pro-active approach for preventing cross contamination. Saves money in the long-run

✓ FAST

Automated process is 10 times faster than manual washing

✓ ECONOMICAL

Fraction of the cost compared to manual sanitation process or large truck wash system

✓ SIMPLE

Easy installation, plug-and-play system, and low maintenance

✓ RELIABLE

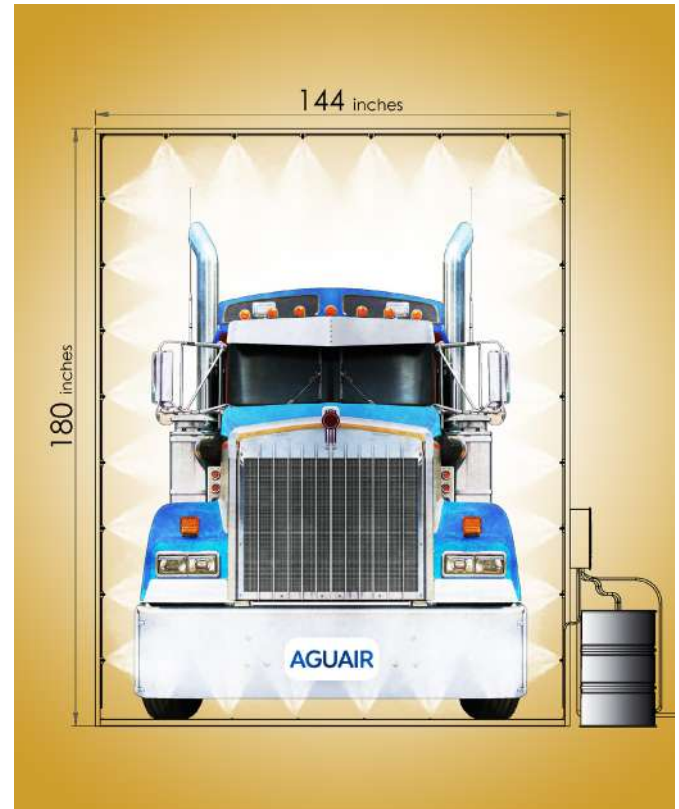

High quality components for continuous operations

✓ APPLICABLE

Works with any sized vehicles

Aguair 360° Vehicle Disinfectant System

Our truck disinfectant system provides a necessary security measure to help secure your farm, feed mill, or processing plant from biosecurity risks.

▲ 27 nozzles provide a 360° complete coverage for all sized vehicles.

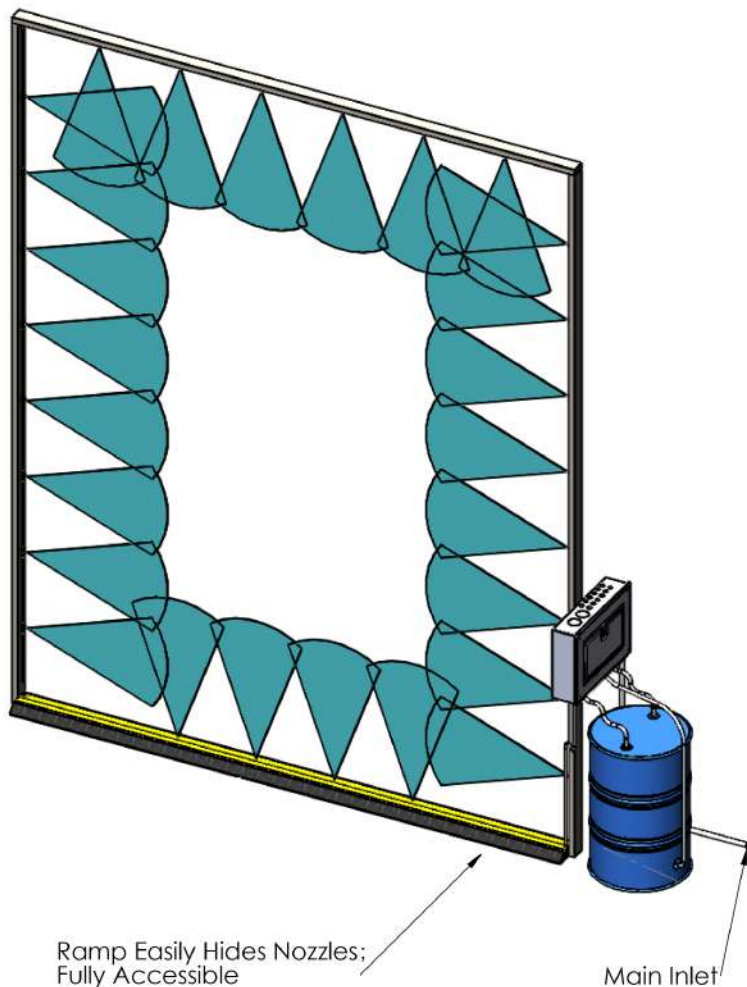

Prevention is always cheaper than cure

Biosecurity™

The Aguir Vehicle Disinfectant System is a pro-active approach for preventing cross contamination caused by transportation vehicles of all sizes

Control System Components

- Self-cleaning screen filter
- Water resistant enclosure with outdoor mount
- Adjustable solution injector
- Maintenance-free injection system
- Low level solution sensor and indicator light
- Automatic vehicle detection system
- Active operation alarm
- 1 inch NPT inlet connection
- 40-50 PSI operating pressure (no pump required)

Nozzles

- Flat 110° spray pattern provides complete coverage for all sized vehicles
- Minimum 50 PSI operating pressure
- 27 nozzles
- Chemical resistant PVDF nozzles and poly tubing

Biosecurity Sanitation System

Requirements:

- 110V/20A Outlet
- 1in Pipe 40-50 PSI Inlet Water

Water Usage:

- 4.5 Gallons per Truck

Spray Frame

- Galvanized steel frame — G90
- Entry speed bump
- 360 degree coverage of the vehicle
