

Next Generation 6-Stage Air Purification Technology

LISTED

The ClensAir® Advantage

Grow room air purification promotes healthier crops and a healthier working environment. Ideal grow room air smells clean and is free of dust, spores, odors and other particulates. Airborne impurities should be eliminated when growing valuable crops indoors or in modern greenhouse environments. Pathogen outbreaks like powdery mildew can have serious consequences for crops and growers.

ClensAir® is a Next Generation Air Purification technology that utilizes the latest UV based photocatalytic disinfecting process combined with advanced media filtration and a 6-layer purification process to greatly reduce microorganisms, VOCs, airborne mold, and pathogens.

ClensAir® systems are easy to install, operate quietly and take up a minimum of space in growing areas, locker rooms, supply areas, trimming rooms and other places in a growing facility where air quality counts.

Protect your investment

Destroy Powdery Mildew fast!

The **fastest** and **most effective** mold, mildew, microbial and odor removal system on the market

Independently tested by the Research Triangle Institute.

ClensAir™ exceeds EPA industry sanitation standards.

What Makes ClensAir® The Best Choice

- ✓ Great for grow houses of all sizes
- ✓ Destroys airborne powdery mildew 10x faster than competitors' systems
- ✓ Removes odors and other volatile organic compounds (VOCs)
- ✓ Energy efficient & low maintenance
- ✓ No toxic emissions or ozone released
- ✓ Food safety compliant
- ✓ Promotes maximum yield for maximum profit

Controls Odor

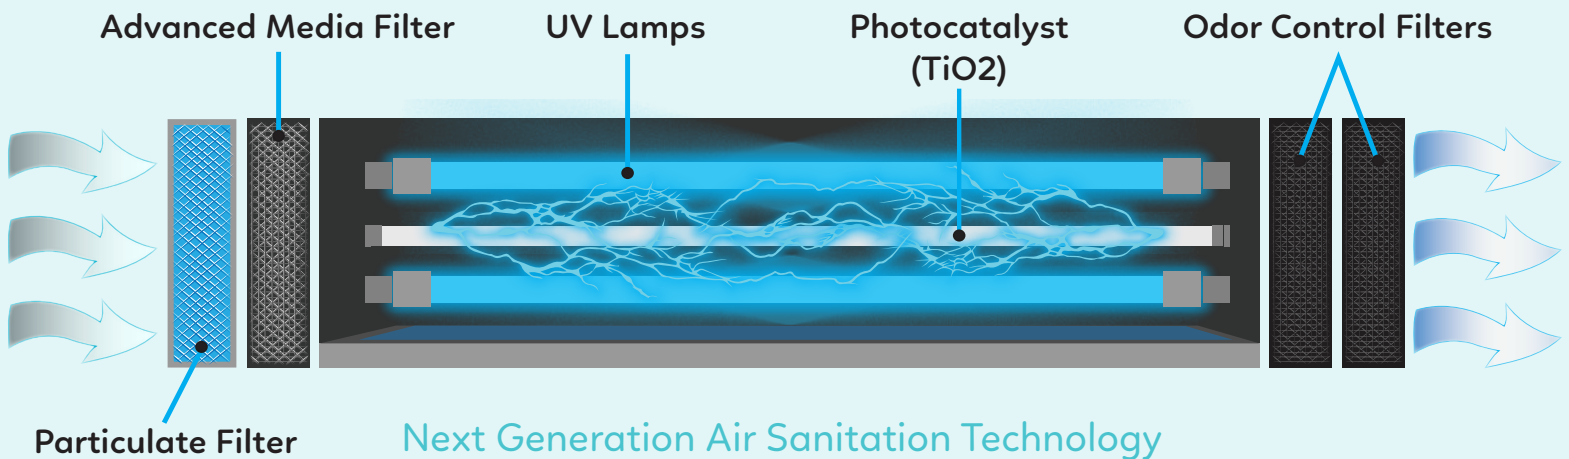

Safe, sustainable, and easy to use

Revolutionary engineered to reduce airborne pathogens, molds and odors

Higher yields result in higher profits

No Ozone

ClensAir® Patent Pending 6-Stage Air Purification Process

Model	Unit Capacity (cubic feet per minutes)	Dimensions			Electrical Requirement (Amps)	Power	Number of Lamps	Max Treatment Capacity (cubic feet per day)
		Length	Width	Height				
ClensAir 10K	167	42in	9.25in	8in	2.0	110V or 220V	2	250,000
ClensAir 10K-E (Ethylene Control)	167	42in	9.25in	8in	2.0	110V or 220V	2	250,000
